

The AI-native cloud for teams that ship.

Your own software factory.

🚀 Run it from the UI or let your agent drive.

FROM REPO TO PRODUCTION. ALL IN ONE MCP.

YOU

```
>_ claude mcp add rock8cloud --transport http https://app.rock8.cloud/mcp
```

🔗 Rock8Cloud connected to Claude Code.

YOU

🚀 Let's get this repo live.

AGENT

It's live at <https://my-service-api.rock8cloud.app>

YOU

🚀 Add a Postgres database and connect it to the api.

AGENT

Done. DATABASE_URL is set in the api's env vars.

YOU

```
>_ git push
```

🔗 Deployed on push. No pipeline to maintain.

YOU

🚀 What broke in the last deploy?

AGENT

A slow query on /orders. The fix is in PR #44.

Or start from open-source blueprints we maintain.

 github.com/rock8-cloud

ASK YOUR AGENT

The cloud built for your agents.

Your whole cloud, one prompt away.

Why did the last build fail?

↳ DATABASE_URL is missing in the worker.

Is anything down right now?

↳ All 6 services are up.

Start an agent to add rate limiting.

↳ On it. PR #51 opens when it is done.

What did the reviewer flag on PR 217?

↳ An unchecked null in the payment handler.

Check the last day's logs for errors.

↳ 2 errors, both a timeout on /checkout.

Roll the api back to the previous deploy.

↳ Done. Build #212 is live again.

Deploy the CMS blueprint.

↳ Cloned into your GitHub and live.

Publish this report as a page.

↳ Shared at q3-report.rock8cloud.page

50+ tools over a remote MCP server. Works with Claude Code, Cursor and any agent that speaks MCP.

WHY WE BUILT IT

Fast enough for a prototype. Solid enough for production.

We're a software house. For ten years we have run production in Central Europe: a health insurer serving 150,000+ people, one of the country's biggest e-shops, theatre ticketing at 400 requests a second.

Now AI lets every team build its own personalized software, and all of it needs a secure way to go live. Rock8Cloud puts a prototype online in minutes, then runs it in production on the same tech behind those systems.

30 DAYS FREE · NO CARD

Flat from €5/mo. AI budget included. Hosted in the EU.
